

What is claimed is:

1. A shoulder strap neck reliever for a seatbelt having two straps, comprising:

5 a base with a front side and a back side, said base including an H-shaped slit having a left opening and a right opening, and

10 a clip spaced apart from and connected to said base substantially parallel to the base and defining a strap holding area therebetween, wherein said base and said clip are non-releasably attached.

15 2. The shoulder strap neck reliever of claim 1, further comprising:

a first strap threaded into said left opening and passing along the back side of the base and threaded out through said right opening, and

20 a second strap clipped into said strap holding area.

25 3. The shoulder strap neck reliever of claim 2, wherein said first strap is a shoulder strap and said second strap is a lap strap.

4. The shoulder strap neck reliever of claim 2, wherein said first strap is a lap strap and said second strap is a shoulder strap.

30 5. The shoulder strap neck reliever of claim 3, further comprising slack pulled from said shoulder strap and wrapped around said clip.
